Decent skins, but not worthed to buy it separately. You all better buy kombat pack for this. Skins that i don't even have, MKX fix your\u2665\u2665\u2665\u2665\u2665 I can't even see the skins and i've purchased it.. The Samurai Pack, for the inner weeb in you.. Is this a joke? \$3.99 for 3 skins that aren't even that good? What in the ever loving hell is going on with NetherRealm studios right now that they see it ok to charge this much for so little? Are they trying to become the new EA now just because the franchise is getting popular again? We seriously need to squash this before it gets out of hand, vote with your wallets people. Don't buy this garbage, or at the very least wait for a sale that makes it AT LEAST \$0.99.. i enjoy things form ancient times like ancient japan,ancient greece ancient china and they look prety cool. I need healing

- Naruto from pokiemans
